

RITRANSPARENCY REPORT 2020

StepStone Group LP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

We incorporate ESG into our external manager monitoring process

We do not do ESG incorporation

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

StepStone incorporates responsible investment considerations into all stages of the investment process, including due diligence, investment decision, and monitoring and reporting. This is true for each of our asset classes (private equity, real estate, infrastructure, private debt) and across strategies (primary investments, secondary transactions and co/direct investments). StepStone has developed an accountability structure which facilitates firm-wide support and commitment to our ESG policy and processes. The following committees and teams take ownership of the responsible investment process as detailed helpw

SELECTION/APPOINTMENT

The Executive Committee approves StepStone's responsible investment policy and mandates the ESG Committee which is governed by formal charter. The ESG Committee reviews and updates the responsible investment policy annually, provides training (including annual firm-wide trainings and sector specific trainings), responds to responsible investment queries, reviews and approves the quantitative and qualitative responsible investment assessment in investment memos, opines on material ESG issues that arise during due diligence or post-investment, and promotes responsible investment in internal operations. Members of the ESG Committee also sit within one of five ESG Workgroups – a workgroup for each asset class and one at a firmwide level. These workgroups are responsible for ensuring asset class specific tailoring of the process and engagement with the due diligence teams and providing quidance and feedback as the relevant investment teams conduct ESG due diligence.

The investment team that conducts due diligence on any given investment is responsible for a thorough ESG review and the approach follows a clear framework which is embedded in our internal data management system, called SPI. This allows for ease of collection of data and reviewing by the relevant asset class specific ESG workgroup, noted above. Within primary due diligence there is a focus on the GP's ESG policy, governance/accountability, implementation process, ESG related data / KPIs and disclosure/reporting. Additionally, StepStone has been utilizing an ESG GP Scorecard since 2018. In May 2019, this Scorecard became a mandatory component of all primary fund underwriting across all asset classes. The Scorecard is intended to supplement and reflect the qualitative ESG assessment that was already in place.

StepStone is committed to being a responsible steward through its investments across sectors, geographies and investment strategies. A key area of focus is "materiality". To determine materiality, the Firm often utilize SASB's materiality map as a guide to ensure the teams are addressing relevant and material ESG factors. StepStone utilizes SASB Materiality Maps across co-investments and secondaries, as well as a tool in evaluation of track records of primary funds.

Additionally, StepStone is a supporter of the TCFD, and has incorporated their framework of physical and transition risks into its due diligence process and specifically into its analysis of the GP's track record. The Firm looks to explore how/whether the GP is actively implementing strategies around climate change within their respective holdings.

Sector teams conducting a primary due diligence request robust ESG DDQ responses from GPs and cover ESG matters in pre-investment onsite meetings and post-investment update meetings and calls. Every Investment Memorandum has a dedicated ESG section – these are reviewed and approved by the ESG Workgroups and then by the ESG Committee. This is a precursor for an investment to be discussed by the relevant investment committee, where critical ESG issues may again be debated. Our comprehensive approach to investment analysis looks to incorporate ESG considerations as part of the overall process and not as a siloed effort.

For co-investments, StepStone upholds its research-focused approach in its review of the company. Responsible investment matters may be demonstrated in product stewardship, labor practices, corrective behavior (following a regulatory or legal violation), leadership structure or depth and transparency in reporting. In these investments, the Firm completes an ESG assessment of the sponsoring General Partner as well as at the asset level directly. SASB informs the risk focus, which is complemented by the due diligence team's understanding of the investment opportunity. The team focuses on these risks as well as opportunities. This evaluation may encompass climate, diversity, modern slavery concerns.

In the case of secondary investments, StepStone reviews the track record of the manager but also has visibility into the ESG treatment of existing portfolio companies. For secondaries, the Firm utilizes primary due diligence where available or requests completion of DDQ questions. StepStone complements this with an asset level assessment of the material value/risk driving underlying assets.

With regard to GP appointments – where StepStone negotiates LPA's on behalf of our clients or discretionary assets, the Firm requests that ESG commitments are incorporated in documentation. Many of StepStone's clients have extensive sideletter requests that encompass opt-outs and/or specific ESG reporting requirements.

MONITORING/REPORTING

StepStone receives quarterly reports from GPs, does one-on-one meetings with GPs regularly, participates in LPAC meetings, and in certain cases, has board representation. These types of meetings and engagements allow for frequent monitoring of investments and ensures any potential ESG risks are continuously supervised. The Firm then reports back on relevant ESG issues to its client in their regular quarterly reporting. If there is a critical ESG incident, it gets reported immediately to clients.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

StepStone believes that incorporating ESG factors into its investment process with the aim of conducting comprehensive risk and opportunity analysis has the potential to (i) enhance the evaluation of forward-looking risk-adjusted returns of an investment opportunity and (ii) protect value for clients.

 $\label{thm:constraint} StepStone's investment strategy includes the following:$

- Shared values: Entrust capital with partners/managers we know and have shown alignment to the responsible investment philosophy noted above;
- Risk Adjusted Returns: Outperform the market by focusing on risk-adjusted returns where both risk and return considerations have embedded responsible investment factors. This results in improved asset pricing and enhanced capital allocation decisions;
- Clarity on the investment objectives: Well defined investment objectives that include financial and non-financial factors results in improved outcomes. This should also encompass exclusions/ restrictions;
- Alignment: Seek out investments where GP and LP interests are aligned;
- Sustainability in action: evidence from partners/managers of considered evaluation of environmental, social and governance factors which
 encompasses climate, diversity and Modern Slavery considerations;
- Active Management: StepStone seeks out active ownership through board seats on primary, secondary and co-investment opportunities, AGM participation and proxy voting of public companies. StepStone seeks partners / managers that will likewise engage with board and company management.

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Responsible investing is in alignment with StepStone's core values and is reflected in the investment policy of the Firm. As an allocator of over US\$280 billion in private markets, StepStone recognizes its role in promoting the consideration of environmental, social responsibility and corporate governance factors through its investment process, and in our active engagements with our partners/investment manages and clients. Our investment policy includes the following elements of ESG incorporation:

- 1) Commitment: Our firm-wide belief that incorporating ESG risk factors and opportunities across the platform has the potential to (i) enhance the evaluation of forward-looking risk-adjusted returns of an investment opportunity and (ii) protect value for clients.
- 2) Investment Process: As a signatory of UNPRI and TCFD, we systematically include ESG and climate considerations in screening, due diligence and decision making. This policy is applicable globally and its application is tailored to each asset class and investment strategy without exception. Every Investment Memo must contain a dedicated ESG section which includes the consideration of climate change. This ESG Section has to be approved by the ESG Committee prior to being considered by the relevant Investment Committee.
- 3) Monitoring, Reporting and Transparency: Post-investment, StepStone reports on ESG through its quarterly reports as provided by managers or on an ad hoc basis, depending on the nature of the issue. For example, critical incident reporting is included. StepStone also seeks engagement with investment managers to advocate for and support their ESG process improvements. This includes encouraging adoption of PRI, suggestions on process improvements, and identifying relevant resources. Where StepStone sits on an LPAC, then StepStone

SG 03.2 StepStone maintains a detailed Global Compliance Manual, Code of Ethics, and Allocation Policy, which the Firm adheres to in order to maintain the highest level of professional service. StepStone's compensation and Firm ownership structure closely aligns the Firm's interests with those of its clients. StepStone treats all clients fairly and equitably. Further, the Firm does not have any financial relationships with affiliated or other organizations; and StepStone does not host any events where fees are collected from managers, clients or third party providers. StepStone employs a full-time General Counsel and Chief Compliance Officer and 13 additional dedicated legal and compliance team members to help the Firm identify and manage any potential conflicts. In addition, as registered investment advisers and fiduciaries to its clients, each of StepStone Group LP, StepStone Group Real Assets LP, StepStone Group Real Estate LP, StepStone Conversus LLC, and Swiss Capital Invest Holdings (Dublin) Limited has an affirmative duty to act in the best interests of the client and to make full and fair disclosure of all material facts and circumstances particularly where StepStone's interests may conflict with those of a client. O No Private Mandatory Gateway/Core Assessed Indicate if and how frequently your organisation sets and reviews objectives for its responsible investment activities. ✓ Quarterly or more frequently O Biannually O Annually O Less frequently than annually O Ad-hoc basis O It is not set/reviewed Additional information. [Optional] StepStone's ESG committee and multiple ESG workgroups each convene on a monthly basis to discuss ongoing ESG objectives and strategy. Each of thes meetings is led by StepStone's global head of responsible investing, Suzanne Tavill, Partner. Suzanne ensures that the committee and each workgroup is focused on continuously improving the firm's ESG objectives and developing new approaches to enhance our existing policies and position. In between these monthly discussions, members of the ESG committee and each workgroup are collaborating on ongoing ESG projects and goals, oftentimes on a daily basis. StepStone's ESG objectives and policy undergo formal review annually to consider the following factors: 1) How well is the policy working? Is it achieving the goals the Firm set out for it? 2) Are the policies consistent StepStone's investment beliefs? 3) Has anything changed? For example, have new market risks emerged that should be addressed and/or monitored or has the Firm expanded into new asset classes that are not yet covered by our policy. 4) Are there enhancements to best practice responsible investing that could be added? SAM 04.4 Provide additional information relevant to your organisation's appointment processes of external managers. [OPTIONAL]

When picking external managers, StepStone conducts a very thorough due diligence process. Ms. Suzanne Tavill, Partner, is Global Head of Responsible Investing at StepStone. She chairs the ESG Committee that is composed of senior investment professionals located in varied regions and representing a cross-section of asset classes and functional areas. The ESG Committee's mandate is to develop StepStone's ESG policy, approach to ESG analysis, advocacy and provide training across the firm. Importantly, the ESG effort is supported by the entire Partner group, across 19 offices in 13 countries, who all have responsibility for policy implementation. Research is carried out by the more than 150 investment professionals, who are organized by sector and geography to ensure broad and deep coverage of the private markets. The team that conducts the due diligence is responsible for the fact finding through review of ESG data and sustainability reports. Each asset class has an ESG Workgroup that spans regions and investment strategies. These workgroups are responsible for the oversight of ESG due diligence and monitoring across the various sector team's investment activities and driving best practice within their respective business. Every Investment Memorandum has a dedicated ESG section – these are reviewed by the relevant ESG workgroup and ESG Committee. During this process, there is active feedback between the workgroups and the due dilligence team to ensure that the ESG section is completed in full. Approval is required by the ESG Committee before the investment goes to the Invesment Committee for review. Then, as part of the investment process, the information is discussed in the Investment Committee meetings. Our comprehensive approach to investment analysis looks to incorporates ESG considerations as part of the overall process.

Post investment, StepStone will monitor managers to ensure they are meeting their stated objectives/plans related to ESG integration. These could include, but are not limited to, i) development/refinement of an ESG policy, ii) inclusion of ESG in LP reporting, iii) holding internal training sessions.

StepStone Infrastructure performs an annual Health Check on managers and funds, which includes a review of ESG performance and UNPRI scores. Any deterioration in ESG performance will trigger an action to enage with the manager on required steps to recover performance.

Provide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for your organisation during the reporting year.

☑ Add Example 1

Topic or issue	Driving improvements to ESG reporting during manager selection and monitoring
Conducted by	Internal staff
Asset class	Infrastructure
Scope and process	StepStone identified the need to drive improvements in ESG reporting, performance measurement, and building a better understanding of climate-related risk from our managers.
Outcomes	During the year StepStone implemented the following actions: Included new sections dealing with climate related risks and measures into our due diligence process, including improved reporting and adoption of the TCFD recommendations. We worked with managers to build a clearer view of the implementation timeline for these key measures Engaged with our existing managers to encourage adoption of the TCFD recommendations and build an understanding of their progress towards implementing its key recommendations Became a member of GRESB and started using GRESB reports to provide further insight into ESG performance during due diligence

☑ Add Example 2

Topic or issue	Notable ESG event at a portfolio company
Conducted by	Internal staff
Asset class	Infrastructure
Scope and process	During the due diligence process of an infrastructure fund, the manager communicated the existence of a robust ESG policy and practice. However, one of their assets recently had a notable ESG event that raised questions on its implementation.
Outcomes	Our team indicated the need for more involved conversations with the manager, understanding what went wrong and the mitigating actions put in place, in order to proceed with the process of approving the investment.

☑ Add Example 3

Topic or issue	Quality of RI process implementation in Real Estate manager
Conducted by	Internal staff
Asset class	Property
Scope and process	As part of StepStone's standard due diligence process we requested our DDQ to be completed. The responses on RI were inconsistent - for example, the investment manager had a very comprehensive policy but were unable to support this with any examples of implementation such as examples of responses to Investment manager's due diligence process; investment memos focused on ESG issues. StepStone engaged with the investment manager at both regional and headquarter levels to ensure we had understood their process correctly.
	The Investment Manager admitted that their implementation was lacking and that many of the issues we had highlighted were on their "to do" list.
Outcomes	StepStone required the following: minimum levels of building certification compliance in acceptable building standards; investment manager to submit to GRESB; when the investment manager chose to subcontract to another investment manager then minimum standards of UNPRI assessment were required; Stepstone client to have right of opt-out on all investments post review of due diligence; comprehensive reporting framework agreed upon

🗹 Add Example 4

Topic or issue	Investment Manager's lead portfolio manager accused of criminal infraction.
Conducted by	Internal staff
Asset class	Property
Scope and process	StepStone staff reviewed all available legal documentation; engaged with the Head of HR and Head of Legal at the relevant Investment Manager as well as conducted meetings with the specific person. The Firm worked to understand the infraction, how the investment manager had identified this issue or not, and how the investment manager had communicated and managed this issue.

	Outcomes	Investment Manager undertook to amend their process of vetting staff and communicating issues with existing and potential clients.
☑ Ad	dd Example 5	
	Topic or issue	Investment Manager did not have a responsible investment policy
	Conducted by	Internal staff
	Asset class	Private equity
	Scope and process	StepStone engaged with the investment manager explaining the importance of having an RI policy and the steps the GP should take to establish a policy and related internal governance structure. StepStone works to engage with senior leaders of the investment manager to ensure appropriate buy-in.
	Outcomes	Investment Manager set up a Responsible Investment policy
☑ Ad	dd Example 6	
	Topic or issue	Investment Manager did not incorporate climate considerations
	Conducted by	Internal staff
	Asset class	Private equity
	Scope and process	StepStone worked to explain to the investment manager why climate was an important consideration for their strategy and importance of TCFD framework.
	Outcomes	Investment manager has moved to incorporate a climate focus in their investment process - specifically a focus on climate risks and opportunities and labelling them as such.

Private Mandatory PRI 2 Indicate whether your organisation's investment activities are guided by a responsible investment policy / follow responsible investment ✓ Our investment activities are guided by a responsible investment policy Describe how your organisation outlines expectations on staff and portfolio companies' approach towards ESG issues in StepStone fundamentally believes that the integration of ESG considerations will lead to improved and sustainable risk-adjusted returns. As such, we have a RI policy which is reviewed annually and adopted across the firm. We have fully integrated an ESG process across all asset classes, including Private Equity. Part of the ESG Committee's mandate is to provide training across the firm, and this effort is supported by the entire Partner group at StepStone, who all have responsibility for policy implementation. Additionally, each asset class has an ESG Workgroup that spans regions and investment strategies. The Private Equity workgroup numbers five investment professionals from four different offices The team conducting investment diligence is responsible for fact finding through review of ESG data and sustainability reports. Through this process we inquire whether the manager is a signatory of the UN PRI and TCFD, whether the ESG policy has been implemented, and a host of additional ESG-related inquiries. We discuss responses and our findings during onsite diligence meetings and seek examples. Finally, StepStone seeks out active ownership through board seats on primary, secondary, and co-investment opportunities, AGM participation, and proxy voting of O ur investment activities are not guided by a responsible investment policy O We do not have a responsible investment policy Mandatory Indicate if your most recent fund placement documents (private placement memorandums (PPM) or similar) refer to responsible investment ✓ Yes Indicate how your most recent fund placement documents (PPM or similar) refer to the following responsible investment: Policy and commitment to responsible investment Approach to ESG issues in pre-investment processes Approach to ESG issues in post-investment processes ✓ Approach to ESG reporting O No O Not applicable as our organisation does not fundraise Private PRI 1 During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments ✓ Yes

PE 05.2 Describe your organisation's approach to incorporating ESG issues in private equity investment selection.

StepStone has developed an accountability structure which facilitates firm-wide support and commitment to our ESG policy and processes. The following teams take ownership for their part in the ESG process, as detailed below.

The ESG Committee assembles and updates ESG policy, provides training, responds to ESG queries, reviews the ESG section in investment memos, opines on ESG issues and rating, and promotes ESG consideration throughout the firm, as well as outwardly. The Executive Committee approves StepStone's ESG policy and mandates the ESG committee.

Members of the Private Equity ESG Workgroup drive ESG focus and provide guidance and training, review ESG due diligence responses, provide suggestions for areas of due diligence, review ESG sections of investment memos, liaise with the ESG committee, document ESG-relevant examples from portfolio investments, and develop sector-specific considerations and projects.

The Sector Deal Teams assess ESG throughout the due diligence process, engage with each ESG Workgroup, inquire and make suggestions, and create the ESG section for Investment Committee memos.

When considering a primary investment, StepStone looks at the manager's approach and commitment to ESG. StepStone will inquire if the manager is a UNPRI and TCFD signatory, whether an ESG Policy exists and has been implemented, in addition to a host of additional ESG-related inquiries. Sector Deal Teams will review each fund manager's ESG policy, climate policy, and monitoring framework. We'll assess their level of commitment, level of partner/management involvement and advocacy, approach to ESG training, use of external resources in diligence, and monitoring and reporting of ESG compliance. We will discuss questionnaire responses during on-site diligence meetings, and assess the manager's approach through individual portfolio company reviews, as examples. We seek diligence and monitoring examples regardless of policy status. We also consider GP-level topics, such as governance, economics, alignment, diversity, and retention in our assessment. In additional to a qualitative assessment, StepStone will award the GP a quantitative score based on our internally developed, GP-level quantitative scoring framework to assist us in tracking a manager's responsible investment focus and evolution over time.

Every Investment Memorandum has a dedicated ESG section which is reviewed by the relevant ESG workgroup and ESG Committee who must approve it before submission to IC is permitted. Once approved by the ESG Committee, the Investment Committee takes the ESG section into consideration for final approval. StepStone's IC may turn down an investment if the target fund/company lacks sufficient commitment to responsible investment/operations.

For co-investments, as with all of our investments, StepStone upholds its research-focused approach in its review of the company. In addition to considering the fund manager's ESG practices and commitment discussed above, StepStone considers the asset level ESG risks and opportunities throughout the diligence process, starting with investment screening, and documents this assessment in its IC materials. ESG matters may be demonstrated in approach to climate considerations, product stewardship, labor practices, corrective behavior (following a regulatory, legal, or other violation), leadership structure or depth and transparency in reporting. As certain sectors and businesses will have different types of relevant risks and opportunities, StepStone's evaluation will make use of the SASB Materiality Maps. StepStone also considers GP provided materials and external consultant reports and assessments. StepStone reviews how the GP has isolated ESG related risks and mitigated them including the use of deal structuring, ring-fencing, insurance, repricing of the asset.

With respect to secondary transactions, StepStone utilizes full primary ESG assessments where available along with an evaluation of the ESG risks and opportunities of the key, value-driving assets.

StepStone is dedicated to identifying the risks and opportunities that drive value and continues to evolve the ESG program toward exceeding the highest standards of responsible investment and objectives of clients.

O No

PE 06.1 Indicate what type of ESG information your organisation typically considers during your private equity investment selection process.

Sex Raw data from target company
Benchmarks against other companies
Sector level data/benchmarks
Country level data/benchmarks
Reporting standards, industry codes and certifications
International initiatives, declarations or standards
Fingagements with stakeholders (e.g. customers and suppliers)
Advice from external resources
Other, specify
We do not track this information

PE 06.2 Describe how this information is reported to, considered and documented by the Investment Committee or similar.

 $ESG\ information\ is\ reported\ to\ the\ Investment\ Committee\ through\ inclusion\ in\ the\ investment\ memorandum\ of\ an\ investment\ presented\ for\ consideration.$

This information has been reviewed by the ESG workgroup, which is an asset specific workgroup composed of investment team individuals drawn from around the globe. The workgroup is focused on reviewing ESG due diligence and providing feedback to the Sector Deal Team before the investment is submitted to the Investment Committee.

The Sector Deal Teams assess ESG throughout the due diligence process, engage with the ESG Workgroup, inquire and make suggestions, and create the ESG section for Investment Committee memos. In every case, the Sector Deal Teams are responsible for including asset-class specific due diligence questions and providing those responses to the ESG Committee and ESG Workgroup which oversees the process and provides feedback and support.

The ESG Committee reviews the ESG section in investment memos, opines on ESG issues and rating, and promotes ESG consideration throughout the firm, as well as outwardly. Once approved by the ESG Committee, the Investment Committee takes the ESG section into consideration for final approval.

Private Private PE 13 Private Additional Assessed Private Private Descriptive Private

Datacenter investment - a review of historical electricity usage identified that significant energy was required to operate the assets; however electricity came from renewable sources and is certified as 100% coming from hydraulic power. In addition, assets have cooling systems that use external cold air to save energy.

Contamination

Environmental example 2, description

Land investment - contamination of the land site due to its previous use as a maintenance area for the city rail operator; a third-party consultant was engaged to review the environmental reports and assess the potential cost of remediation, which was incorporated into the investment team's underwriting.

Waste management

Environmental example 3, description

Science park investment - leases were reviewed for specific provisions related to disposal of hazardous or biohazardous waste and site managers interviewed to understand enforcement of such requirements.

Social

Occupier Satisfaction

Social example 1, description [OPTIONAL]

Multifamily redevelopment - redevelopment work required vacating tenants from existing units; however, redevelopment plan was phased such that tenants could be moved to alternative units on the same site (at rents in-line with tenants' existing obligations) to minimize displacement.

Building safety and materials

Social example 2, description [OPTIONAL]

New construction - manager was working with a third-party contractor, who would be overseeing physical laborers on-site. Although the manager would not have direct oversight of working conditions and employment practices, the manager only contracts with organizations that comply with the Universal Declaration of Human Rights and Core Conventions of the International Labour Organization.

Socio-economic

Social example 3, description [OPTIONAL]

Multifamily in a supply-constrained market - in order to obtain planning from the local government for construction of new multifamily units, business plan involved 17% of the development being dedicated social housing units at rents that are 40% below market-rate units but are identical in quality.

☑ Governance

Anti-bribery & corruption

Governance example 1, description

Co-investment with a manager with historical compliance and anti-corruption incident - reviewed the firm's response to the incident and how problem individuals were addressed; and the implementation of polices to prevent a similar situation from happening again. The actions included immediately firing the individuals involved, restructuring of the compliance department, hiring a number of ex-SEC officials and the implementation of new policies including creation of a new Business Risk Committee, which reviews all new transactions. SRE engaged with the manager and advocated for specific actions which were adopted.

Board structure

Governance example 2, description

Investment in a newly-formed healthcare real estate manager - although key principals had significant experience related to the investment strategy, they had limited experience running an asset management business; as a result, SRE required that the manager bring in required expertise to join the board and take an ownership position in the GP, including individuals with private equity, public market company and healthcare experience; SRE also required a seat on the board to continue to monitor the manager's actions and advocate for enhancements as required.

Shareholder structure & rights

Governance example 3, description

SRE requires control rights in accordance with its ownership interest in various investments, ranging from control over major decisions where it is the majority owner to minority protection rights, including vetos over decisions that negatively impact its interests, in situations where it is a minority investor.

	0	Given much of the active asset management in SRE's secondary and co-investments is done through its investment partners, SRE first establishes a regular reporting process with its investment partners for reporting, which is regularly reviewed against industry norms and guidance from respected bodies. SRE reviews this reporting for (1) the partners' ongoing responsible investing practices, (2) progress on ESG opportunities identified for the specific investment during the due diligence process and (3) any ESG risks and opportunities that have arisen post-investment. SRE actively engages with its investment partners on any major deviations from the initial business plan, including as related to ESG issues. For investments in which SRE has a significiant ownership interest, it also seeks out active ownership through board seats. Through active participation, SRE seeks to effectively manage any ESG-related incidents that may occur within its investments and pro-actively implement initiatives that are both beneficial from an ESG perspective and create economic value. Examples of SRE's management of ESG issues include: • SRE made an investment alongside a diversified real estate manager in the Nordics with a heavy development component. As an active asset manager and developer, the GP has been focused on both efficiency as it relates to resource usage as well as opportunities to refine its construction process for new developments. For example, it is developing new properties with recycled concrete, which has shown to be just as cost effective as conventional concrete. • When evaluating a US skilled nursing portfolio which was 100% leased to one tenant, SRE hired a third-party consultant to evaluate the cause and trend of its relatively low ratings (only 19% of facilities had high ratings during the diligence period). The sector carries significant liability and reputational risk as it relates to the treatment of residents and quality of care. As a result, quality of care is a key focus area for the government and

Investment partners are scored based on StepStone's ESG scorecard (which assesses partners' approach to ESG)
Diversity of skill-set and background on company boards

Progress Achieved

Completed for all new investments as part of SRE's ESG evaluation
Assessed in SRE's ESG evaluation; if changes required, SRE takes steps with the manager to do so (completed for one, in-process for another)

☐ We do not set and/or monitor against targets

PR 09.3 Additional information, [Optional

Given much of the active asset management in SRE's secondary and co-investments is done through its investment partners, SRE undertakes significant due diligence of ESG practices and risks at the outset of an investment. As part of the initial due diligence process, StepStone conducts an ESG evaluation. As part of this evaluation, an ESG scoring is completed. This ESG scoring is a mechanism for StepStone to evaluate how the GP is performing relative to peers and overtime with respect to their ESG practice.

Post-investment, SRE first establishes a regular reporting process with its investment partners for annual reporting, which is regularly reviewed against industry norms and guidance from respected bodies. SRE reviews this reporting for (1) the partners' ongoing responsible investing practices, (2) progress on ESG opportunities identified for the specific investment during the due diligence process and (3) any ESG risks that have arisen post-investment. SRE actively engages with its investment partnters on any major deviations from the initial business plan, including ESG issues. For investments in which SRE has a significant ownership interest, it also seeks out active ownership through board seats. Through active participation, SRE seeks to effectively manage any ESG-related incidents that occur within its investments and pro-actively implement initiatives that are both beneficial from an ESG perspective and create economic value.

Business Integrity, code of ethics, and corporate governance

Risk management systems and processes, including consideration of ESG issues

Strong Board processes and procedures, internal controls, and internal audit

INF 07.2 Additional information. [Optional]

StepStone follows a holistic approach during due diligence, which includes considerations of asset geography and sector to refine the range of potential ESG concerns. The Firm explores a multitude of ESG factors to make sure that all potential red flags are pinpointed and makes sure that every unique investment is approached with careful analysis. This allows the Firm to better fully identify potential risk factors relating to ESG issues.
